

Table of contents

Volume 1

Preface	III
Table of contents	V
Plenary Session	1
Impact of nondestructive testing and evaluation of wood products	3
Robert J. Ross	
Nondestructive Testing of Wood and Carbon Footprint	9
Chih-Lin (CL) Huang	
NDT of Wood related to Innovative Timber Structures	15
Jean-Luc Sandoz	
Session 1. Tree and log quality	23
Fundamentals of Acoustic Measurements on Trees and Logs and Their Implication to Field Application.....	25
Xiping Wang	
Real-time measures of wood quality - transition from research to application	34
Peter Carter	
An integrated approach for wood quality prediction from standing tree to sawn timber	40
Franka Brüchert, Lars Wilhelmsson, Shaun Mochan, Udo H. Sauter	
In forest assessment of timber strength.....	48
Audun Øvrum	
Measurement of cross-sectional moisture distribution of logs and branches by impedance method using a medium electrode	55
Kohsei Murase¹, Nobuo Sobue	
Mechanical Properties Measurement of Non-defect logs by Using Stress Wave	63
Xuechun Yang, Juying Luo	
Velocity of ultrasonic waves in live trees and in freshly-felled logs of exotic trees grown in Brazil ..	69
Cinthya Bertoldo Pedroso	
Logs vs. sawn timber: nondestructive linking stiffness-strength properties	77
Antanas Baltrušaitis	
Acoustic velocities and NIR spectroscopy as predictors of board stiffness in exotic Caribbean pine .	85
Anton Zbonak, Martin Davies, Kevin Harding and Terry Copley	
Ultrasonic imaging of defects in standing trees – Development of an automatic device for plantations.....	93
Loïc Brancheriau	
Acoustic Imaging of Sandalwood (santalum album) Logs	101
Roger Turpening	
A high speed CT scanner for the sawmill industry	105
Federico Giudiceandrea	
Effect of pruning of Pinus taeda on longitudinal ultrasound speed of standing trees and logs in plantations of North Eastern Argentina	113
Hugo E. Fassola	
Detecting red heart in beech (Fagus sylvatica) by electric measurement	121
Balázs Göncz	
Modeling structural lumber quality for Pinus pinaster Ait. in northwestern Spain using standing tree acoustic assesment, tree characteristics and stand variables	127
Oscar Santaclara, Juan Gabriel Álvarez, Esther Merlo	
Session 2. Urban tree evaluation	135
Integrated system for assessing trees	137
Kolarik Jaroslav	
Evaluation of mechanical properties of green wood of Italian stone pine (Pinus pinea L.)	143
Michel Pirchio	

Ultrasonic wave propagation characteristic of standing tree in urban area	151
Lina Karlinasari, Ivana Lisdiana Mariyanti, Dodi Nandika	
Behavoiur of ultrasonic wave propagation in presence of holes on pequiá (<i>Aspidosperma desmanthum</i>) wood.....	159
Raquel Gonçalves	
Research on propagation velocity of stress wave and ultrasonic wave on indefectible cross section of standing tree	167
Shiquan Song, Lihai Wang , Huadong Xu, Xiangfei You	
Reconstruction of Three-dimensional Stress Wave Tomography for Detecting Inner Defects in Logs.....	175
Lihai Wang, Na Wang, Xiangfei You, Zaixing Yan, Xuechun Yang	
Waveform feature analysis of acoustic emission provides information about dehydration stress in spruce sapwood.....	183
Sabine Rosner	
Acoustic tomography and microdrill resistance density measurements compared to x-ray CT scan on white birch (<i>Betula papyrifera</i>).....	191
R. Bruce Allison	
Relevance of resistance drilling method and computer-based mapping in street tree management interventions in Madrid (Spain).....	199
Calderón Guerrero, C. , Alonso Herbias, E. ; Domínguez Núñez, J. A. ; Saiz de Omeñaca González, J.A.	
Dynamic measurements on branches – link with stability	207
Agnes Kinga Buza, Ferenc Divos	
Session 3. Structural lumber grading	213
Influence of local strength determining defects on grading machine settings based on dynamic measurements.....	215
Andreas Rais	
Grading structural tropical lumber using stress wave, transverse vibration and ultrasonic method.....	223
Fabiane A. C. Pires	
Non-destructive tests for strength grading of Slovenian structural sawn timber	231
Tomaž Pazlar	
Comparison of non-destructive methods of quality estimation of the construction spruce wood grown in Slovakia.....	239
Alena Rohanová	
Factors and models for the grade distributions of sawn timber for Scots pine and Norway spruce in Finland and north-western Russia: visual strength and appearance quality.....	247
Sanna Hautamäki	
Strength Grading of Structural Lumber – Effect of Damping and Knots	255
Ferenc Sismándy-Kiss	
Predict pith location relative to lumber surface using reflected tracheid effect	263
Chih-Lin Huang	
Grading of sawn timber using the vibration technique - Locating imperfections based on flexural mode shapes	269
Min Hu, Marie Johansson, Anders Olsson, Charlotte Bengtsson, Anders Brandt	
Prediction of MOE for Turkish Red Pine: Stress Wave versus Artificial Neural Networks	277
Ergün Güntekin, Yavuz Cengiz, and Tuğba Yılmaz	
Structural grading of lumber using grain angle in a production environment	285
Harry E. Moore	
Grading of thermally modified beech timber	293
Robert Widmann	
Contribution of slope of grain information in lumber strength grading.	299
Arnaud Jehl, Laurent Bléron, Fabrice Meriaudeau, Robert Collet	

Prediction of tensile and compressive modulus from various MOE structural lumber	305
Kwang-Mo Kim, Sang-Joon Lee, Kug-Bo Shim, Conroy Lum	
Evaluation of the influence of visual parameters on wave transmission velocity in sawn chestnut timber.....	311
Abel Vega	
Application of image analysis for detection of wood features from NDT imaging data.	319
Bruno Simões	
Session 4. Engineered wood products	327
Long-term moisture content and deformation measurement of block-laminated timber	329
Thomas Tannert	
Nondestructive evaluation of end-jointed in meranti Wood (Shorea spp.) using ultrasonic wave techniques	337
Lina Karlinasari	
Combining Image Correlation from Optical Methods and Acoustic Analysis for Investigating Damage Evolution in Plywood.....	343
Franziska Ritschel	
Monitoring drying and thermal modification of wood by means of acoustic emission technology ..	351
Jelle van der Beek	
Monitored assessment of structural integrity of multilayered glued laminated timber beams with air-coupled ultrasound and contact ultrasound imaging	359
Sergio J Sanabria	
Theoretical and experimental investigations of damage development of glulam beams	367
Antal Kánnár	
In situ acoustic methods to estimate the physical and mechanical aging of oriented strand board	375
Ignacio Bobadilla	
Evaluating non-destructive portable X-ray Fluorescence (XRF) method for preservative treated wood in service	381
Sung-Mo Kang	
Relationship between Dynamic Cantilever-beam and Static Modulus of Elasticity of Wood Plastic Composite Panels.....	387
Seyyed Mohammad Nabavi, Ali Akbar Enayati, Mohammad	
Volume 2	
Session 6. Vibration based methodes	393
Selected physical and mechanical properties of Chilean wood species Tapa, Olivillo, Laurel, Lenga, Alerce and Manio.....	395
Erik Baradit	
Dynamic Shear and Torsional Modulus of Pine Beams	403
Seyedeh Masoumeh Hashemi Tabalvandani	
Modeling Temperature and Moisture State Effects on Acoustic Velocity on Wood.....	411
Shan Gao	
An investigation into acoustic behavior of reaction woods by flexural vibration method (case study: poplar & spruce)	419
M. A. Saadat-Nia, A. A. Enayati, L. Brancheriau, K. Pourtahmasi	
Assessment of wood using air-coupled US transducer	427
R. Grimberg	
Elastic constants of wood determined by ultrasound wave propagation	435
Raquel Gonçalves	
Ultrasonic NDT of Wood using IDSAM	443
G.H.Agrawal	
Measurement Technique Development in Ultrasound Applied to Tropical Woods	453
Luis Yoza Yoza	

Fixed-free against free-free beams for dynamic young's modulus of wood	461
Mehran Roohnia	
Elasticity Modulus in Peruvian Tropical Woods Using Non-Destructive Techniques –Preliminary Study.....	469
Patricia Inés Carnero Palacios	
Hole influence and FFT variation inspection in poplar Wood by free vibration method	477
A.Yavari	
Preliminary research on the bending characteristics of Hungarian reed bundles	483
Montaña Jiménez-Espada, Ignacio Bobadilla-Maldonado, Rafael González-Escobar	
Preliminary study on the bending elastic behaviour of Hungarian reed stems	485
Montaña Jiménez-Espada, Ignacio Bobadilla-Maldonado, Rafael González-Escobar	
Effect and Mechanism of Subzero Temperature on Propagation Velocity of Stress Wave in Korean Pine Wood	487
Huadong Xu, Lihai Wang	
Session 7. Condition assessment of historical wood structures	
495	
Design property assessment of single members in existing structures - NDE challenge.....	497
Donald DeVisser	
Historic Log Cabin Structural Condition Assessment and Rehabilitation – A Case Study	505
Brian Brashaw	
NDE investigation of the timber foundation in the historic Kennecott Mine Concentration Mill Building	513
James P. Wacker	
Use of laser scanning technology to obtain as-built records of historic covered bridges	523
Brian Brashaw	
A study of the influence of different types of timber footbridges on the vibrational natural frequency.....	531
Vanessa Baño, J. Carlos Santos, Julio Vivas, Soledad Rodríguez, Abel Vega, Keith Crews	
Infrared thermography as a nondestructive technique for the study of wooden structures	539
Carmen Rodríguez Liñán	
An Integrated NDT Approach for Determining Residual Strength of Ancient Wood Structural Members	547
Houjiang Zhang, Xiping Wang, Lei Zhu, Yanliang Sun, Robert J. Ross, and Brian K. Brashaw	
Use of Nondestructive Testing and Computer Aided Design (CAD) for the evaluation of wood condition in a replica of the Spanish ship —Nao Victoria.....	555
Calderón Guerrero, C., Saiz de Omeñaca González, J.A.	
Condition assessment of a 2500 year old mummy coffin	561
Turker Dundar, Robert J. Ross	
In-situ assessment method of wood based on shear stresses obtained from withdrawal resistances of screw-type probes	567
Nobuyoshi Yamaguchi	
Derivation of Mechanical Properties by Pushing of a Pin into Wood	575
Jan Tippner, Michal Kloiber, Jaroslav Hrivnák	
Overview of some non-destructive methods for in situ assessment of structural timber	583
Marko Teder, Kalle Pilt, Matis Miljan, Martti Lainurm, Ragnar Kruuda	
Combining NDT and visual strength grading to assess ancient timber beams stiffness to evaluate strengthening interventions suitability.....	593
Alberto Cavalli, Marco Togni	
Condition Assessment of Ancient Wooden Building for Determining Reuse of the Wooden Members	603
Sang-Joon Lee, Chul-Ki Kim, Kwang-Mo Kim, Ki-Bok Kim, Jun-Jae Lee	
Visualization of internal state of wood with x-ray CT reconstruction technique through out reduced number of x-ray radiography	605
Chul-Ki Kim, Sang-Joon Lee, Kwang-Mo Kim and Jun-Jae Lee	

Stress waves tomography for the analysis of structural timber: limits, applications, possible combinations with other analysis techniques	611
Mariapaola Riggio, Maurizio Piazza.	
Delamination in wood products and wood based composites - the state of the art -.....	617
Voichita Bucur	
Session 8. Other NDT related areas	627
Synchrotron based tomographic in-situ microscopy of wood under uniaxial compression in fiber direction	629
Michaela Zauner, Daniel Keunecke, Marco Stampanoni, Peter Niemz	
Thermal Conductivity Coefficient as a Predictor of Wood Strength	637
Türker DüNDAR, Şeref Kurt, Nusret As, Burhanettin Uysal	
Effect of annual ring structure of wood on 100 GHz millimeter wave beam	645
Soichi Tanaka, Yuko Fujiwara, Yoshihisa Fujii, Shogo Okumura, Hiroyoshi Togo, Shoji Mochizuki, Naoya Kukutsu	
Wood density determination by microwave radar	651
Ferenc Divos, Peter Divos, Istvan Ther	
Sub-surface thermal imaging of bamboo and bamboo-glue interface	657
Suneet Tuli, Smita Chugh, K Chatterjee, Sanjeev Singh, Sudhakar P	
Application of NIR spectroscopy to wood products	665
Satoru Tsuchikawa and Takaaki Fujimoto	
Optical systems application to determine deformations – orientation method application to determine shear modulus	673
Zsolt, Karácsonyi, József, Garab	
Application of esclerometer test method in specimens of eucalyptus saligna	679
Julio Soriano, Raquel Gonçalves, Cinthya Bertoldo, Alex J. Trinca, Mônica Ruy	
Janka and Esclerometer methods to predict the hardness of specimen of Eucalyptus saligna	685
Julio Soriano, Raquel Gonçalves, Alex J. Trinca, Rafael G. M. Lorensani, Ingrid Z. Martins	
Posters	693
Field Acoustic Monitoring of Standing Trees for Wood Quality Assessment	695
Shan Gao, Xiping Wang, Lihai Wang, and R. Bruce Allison	
Non-destructive methods to estimate the physical aging of plywood	697
Ignacio Bobadilla, María Cristina Santirso, Daniel Herrero, Miguel Esteban, Guillermo Íñiguez-González.	
Determination of tensile strain fields in Norway spruce side boards using two master-slave connected contact-free measurement systems based on digital image correlation.....	699
Jan Oscarsson, Anders Olsson, Bertil Enquist, Marie Johansson, Erik Serrano	
Wood and Wood-Based Materials as Sensors--A Review of the Piezoelectric Effect in Wood	705
Robert J. Ross, Jiangming Kan, Xiping Wang, Julie Blankenburg, Janet I. Stockhausen	
Preliminary study on the bending elastic behaviour of Hungarian reed stems	709
Montaña Jiménez-Espada, Ignacio Bobadilla-Maldonado, Rafael González-Escobar	
The health state and stability evaluation of woody plants in urban greenery in Slovakia	721
Marek Kobza, Dušan Juhás, Gabriela Juhásová, Emília Ondrušková, Katarína Adamčíková	
Study of the repeating application of sonic tomography	723
Laura Cevenini , Alberto Minelli	
Field Acoustic Monitoring of Standing Trees for Wood Quality Assessment	727
Shan Gao, Xiping Wang, Lihai Wang, and R. Bruce Allison	
Wood surface monitoring by infrared spectroscopy.....	729
Laszlo Tolvaj, Marta Palkovics	
Electromagnetic and ultrasonic methods for wood.....	733
Markku Tiitta, Laura Tomppo, Jelle van der Beek and Reijo Lappalainen	
Difficul stresses in glue laminated wood.....	735
Csilla Vanya, Zsolt Karácsonyi	

Abrasion some of wood species based on density.....	737
Ali Bayatkashkoli	
Abrasion some of wood products based on density.....	741
Ali Bayatkashkoli	
Non-Invasive, Remote Monitoring of Air-Drying of Lumber and Timber.....	745
George Grozdits, Mark Gibson, Robert Németh and Levente Csóka	
Possibilities of non-destructive tree testing in the field of urban forestry.....	747
Puskás, Lajos	
Volume 2/1.....	751
The formation of the xylem cell during the differentiation process for <i>Populus×euramericana</i> cv.....	751
Guangjie Zhao Enhua Xi	
New Methods for NDT Testing of Wood (Ultrasonic Echo Technique, Radiografic Echo, Fast Neutrons)	753
A. Hasenstab, K. Frühwald, K. Osterloh and T. Bücherl	
Acoustic segregation of <i>Pinus pinaster</i> logs for structural lumber production according to strength classes	755
Oscar Santaclara, Esther Merlo	
The effect of longitudinal compression on the structure and mechanical properties of beech wood material.....	757
László Kuzsella, Zsuzsanna Koncsik	
Wood poles non-destructive inspections; the German example.....	765
Jean-Luc Sandoz, Yann Benoit	
The role of near infrared spectroscopy in evaluating standing tree eucalypt wood quality: comparing field portable and laboratory approaches	773
Roger Meder, Geoffrey M. Downes, Christopher E. Harwood	
Nondestructive assessment of residual strength in southern pine beams undergoing progressive degradation by naturally occurring decay fungi	781
Rodney C. De Groot, Robert J. Ross Susan LeVan Gregory T. Schueneman
